Understanding your nonprofit’s Google Analytics: Find out who’s coming to your site and where they are going

Better Fundraising with Better Data: Understand the data you already have and how you can use it better

CRM Review: Share your current pain points to unlock your CRM’s hidden potential

Website Performance Review: Get tips for how you can make your site faster, perform better in search, and be more accessible for all audiences.
Define Your Goals

Ask the Big Questions

• Why are you hosting this event?
• What is the biggest need from the event?
• What are three accomplishments to achieve by the end of the event?
• Who is our target audience for the event?
Determine Your Event Experience

Presentation or Speaker: This experiences allow viewers to passively engage with curated content.
Determine Your Event Experience

Networking:
This allows viewers to engage with each other via breakout rooms or other interactions.
Determine Your Event Experience

Entertainment: Consider a concert or performance. These events allow your viewers to passively engage with your organization and can easily be shared with their networks!
Types of Events - Virtual

A virtual event is an event where all activities occur online or in a digital space as opposed to a physical venue.
Rescue Her Facebook Live Event

• Virtual tour that provides a real-life glimpse of what human trafficking looks like locally
• Approach was personal as if participants were in a car with Rescue Her staff
• Promoted engagement through practical calls to action (volunteering, recognizing, reporting, and financially supporting)
Types of Events - Simulive

Simulive events are pre-recorded events that are then broadcasted as live. These type of events provide logistical benefits.
Types of Events - Hybrid

These events combine components of both a physical and virtual event.

While the physical event is taking place it is also being broadcasted virtually for a remote audience.

The goal of this event is to provide the same experience to both audiences.
Platform Options

- Zoom
- YouTube Live
- Facebook Live
- Vimeo

What other options have worked for you?
Preparing for the Event

**Audience:** Over-communicate instruction on how to “log-on” to the virtual experience. Don’t forget to send reminders and provide a digital map of the virtual experience.

**Speakers & Hosts:** Test technology early and often. Make sure your speakers and hosts are well acquainted with the run of show. Consider doing a practice run in the days leading up to the event.
Increase Engagement - Storytelling

Storytelling allows viewers to connect deeper with your mission. By creating a deep connection, you will create a more meaningful and impactful experience.
Increase Engagement - Multisensory

Consider providing items that your attendees can enjoy during the event. By engaging their senses, viewers are more likely to remember the occasion and remain engaged.
Increase Engagement - Keep it Short & Sweet

Pro tip: Aim to have your virtual event run for no more than an hour, unless you have engagement opportunities incorporated like a game or a breakout room activity.
Increase Engagement - Make it Social

Allow viewers to add reactions and comments in the chat feature. Utilize breakout rooms for guests to network. Create an event hashtag for viewers to engage on their social media platforms!
Other VIRTUAL Engagement Ideas

- Auction
- Photo Collage
- Interactive Quiz
- Mentimeter/Zoom Poll
- Photo Booth
- Trivia Game
- Scavenger Hunt
Utilize the Data

Ticket Sales & Registration:

Metrics will help determine your marketing campaign effectiveness.

• Did your marketing strategies work?
• Did you communicate efficiently how to log-on?
• How many viewers used your hashtag, commented in the chat, or shared the event?
Utilize the Data

Amount of Viewers and Time Spent Attending:

By cross-referencing the amount of time an average viewer spent on the virtual event with the overall engagement of viewers, your organization will be able to determine what parts of your events were well attended and had the most viewer engagement.
Utilize the Data

Impact on Your Goals:
Determining what the goal of your event is will help you understand whether your event was a success or not. Was the goal to increase donations? Raise brand awareness? Build connections between stakeholders?
Lessons Learned from 2020

• More people attended events for organizations both in-state and out-of-state
• Nonprofits can spend less on virtual events but raise more dollars
• Events have a longer lifespan
• Data can still be provided on attendees
• There can be a greater ROI on events
